

There are some things money can't buy.

EXPERIENCE is one of them.

Our equipment division emerged from the need for effective oyster farming gear that was readily available. Gear that we knew worked because it was used and developed on our own farms. Our customers receive a wealth of knowledge that comes from growing oysters for almost 15 years. Knowledge of what works, what doesn't, and what will give you the most profit for your situation.

Contact our sales department today to get started.

UPWELLING PACKAGES

TANK UPWELLER PACKAGE

A complete tank upweller unit includes everything except a pump and external plumbing. It arrives to you ready to be used that day—all you need to add is the water. The tank interior is fully plumbed and all buckets are mesh lined (includes 500 and 750 micron screens.) If you are buying small seed from a hatchery or are setting your own larvae, this unit will help you carefully and efficiently bring them to a size to go into a floating upweller or a small mesh bag.

Tank Upweller Complete: \$ 3,975
Less Year End Savings: (\$400)
Total Equipment Cost: \$ 3,575

FLOATING UPWELLER KIT PACKAGES

Floating upwellers are an absolute necessity if you want to move large quantities of seed through a nursery system and onto a farm in the shortest amount of time possible. All packages are labeled according to silo size, the larger the silo the more animals it will handle. All packages are available in three different configurations: complete, no floats, no floats and rod.

22" Package	Cost	(Save)	<i>Sale Price</i>
Complete Kit:	\$6,500	(\$450)	\$6,050
No Floats:	\$5,500	"	\$5,050

PACKAGE #6

Hopper Conveyor and Exiting/Sorting Conveyor

Great addition if you want to wash and prep oysters for packaging or if you have a hand-fed sorter. This package will amplify your productivity, speed, and efficiency while saving labor costs equivalent to 2-3 workers. These units pay for themselves in four months based solely on saved labor cost. This is outside of your increased revenue due to higher productivity.

Hopper conveyor is your choice of a two-piece unit (bin and 10' conveyor) or one-piece elevator conveyor. 10' exiting/sorting conveyor is 22" wide and 36" high and includes a 316 stainless steel chain conveyor belt. (Unit can be outfitted with a product washing package for an additional \$500)

Shown with washing package

Electric Motors

Equipment Price: \$19,900

Less Year End Savings: (\$1,500)

Total Equipment Cost: \$18,400

Hydraulic Motors

Equipment Price: \$19,000

Less Year End Savings: (\$1,500)

Total Equipment Cost: \$17,500
